

Wear a mask properly in accordance with a situation

It is continuously vital to wear a mask as an essential countermeasure.

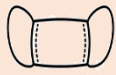

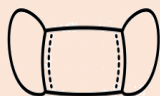

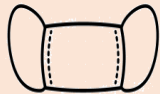

Please make an appropriate decision on wearing / not wearing a mask based on the following scene.

 : Wearing a mask is recommended
 : No need to wear a mask

Indoor

Definition of "Indoor"

Inside buildings, underground malls, public transportation, etc., where the inflow of outside air is blocked.

		Social Distance (2 M or more)	
		Secure the distance	Not able to secure the distance
Conversation	Have	  * Ex. Meeting in well ventilated large rooms	 Smoking room / Changing room
	Don't have	 Reading in a library with social distancing	 Commuter train (when crowded)

* If you take infection countermeasures including sufficient ventilation, you can take off your mask.

Outdoor

		Social Distance (2 m or more)	
		Secure the distance	Not able to secure the distance
Conversation	Have	 Ex. Catch ball, tennis	 Watching sports without social distancing
	Don't have	 Walking, cycling	 Passing by people while walking or cycling

From the viewpoint of preventing heat stroke, it is recommended that you take off your mask when temperature and humidity are high.

Wear a mask if you have any chance to contact people with a high risk of serious illness, such as meeting older people or going to the hospital.
